# MAYNE MAPS - WINERY SAMPLE MAPS

## Sirromet - Seven Scenes Vineyard in Ballandean

The Seven Scenes Vineyard on the Granite Belt is one of the vineyards that form part of the Sirromet group owned by Terry Morris ([www.sirromet.com](http://www.sirromet.com)).

The Seven Scenes vineyard is one of the larger vineyards in the Southern Hemisphere.

Sirromet uses this and other maps every day in the production of their wines (See Testimonials).

Poster sized copies of the maps of the three Sirromet wineries are displayed on the office walls.

To map a winery such as this, Alan uses many sources of data.

He extracts the relevant information from topographic maps as well as satellite images.

This is updated with any farm irrigation maps or other maps that the owner may have. Spreadsheet information is then included.

To complete the project, GPS data is often used. This data can be collected by the property owner or by Alan on-site.

If the property owner captures his own GPS information, the files can be emailed to Alan to reduce costs.

When the map is completed, it can be exported into a multitude of file types depending on the needs of the client.

These maps can be used for display at the cellar door, for promotion on the internet, for developing the property and for marketing.

This map can be georeferenced and used by management as an actual map for managing and running the property.

Exciting new GPS technology enables GPS receivers to use these maps on the face of the GPS units. This enables the property owner to travel around his property viewing his property map moving past him on his GPS screen - ideal for precise GPS navigation and recording.

Winery maps such as this have been produced for properties in South Australia, Tasmania and New Zealand without Alan leaving Queensland.

Often, wineries ask for Location Maps to assist clients to locate the winery when they visit. (See Location Map Tab).

Small winery maps normally cost less than \$1000 but a winery as large as this could extend into a few thousand dollars depending on many factors mentioned above.

Contact Mayne Maps and tell Alan about your property and your requirements. He will provide an indication of the cost and also send you samples of maps similar to your property that he has produced in the past.
