## **MAYNE MAPS - SCHOOL MAPS CABOOLTURE STATE HIGH SCHOOL MAP**

To produce a map of a school such as this, Alan uses many sources of data.

He extracts the information from any existing maps or images the school may have including satellite images.

To complete the project, GPS data is often used. This data can be collected by the property owner or collected by Alan on-site.

If the property owner captures his own GPS information, the files can be emailed to Alan to reduce costs.

When the map is finished, it can be exported into a multitude of file types depending on the needs of the client.

School maps such as these can be used in handbooks for students, displayed in class rooms for emergency access routes, in staff rooms for play-ground duty areas on they may be displayed on the web.

Maps similar to these have been produced for properties in South Australia, Tasmania and New Zealand without Alan leaving Queensland.

Often, property owners ask for Location Maps to help visitors to locate the property when they visit. (See Location Map Tab)

Most of the maps produced cost less than \$1000 but the actual cost depends on a number of factors.

Contact Mayne Maps and tell Alan about your property and your requirements. He will provide an expected price or a quote and also send you samples of maps similar to your property that he has produced in the past.
