MAYNE MAPS – SHOWGROUND MAPS

To map a Showground as this one at Glen Innes, Alan uses many sources of data.

He extracts the relevant information from topographic maps as well as satellite images.

This is updated with any maps or other maps that the owners may have.

To complete the project, GPS data is often used. This data can be collected by the property owner or collected by Alan on-site.

If the property owner collects his own GPS data it can be emailed to Alan to reduce the cost of the map.

Alan uses Corel Draw to produce the maps.

When finished, the maps can be exported into any of 50 file types depending on the needs of the client and the purpose of the map.

Most Show Societies have limited funds to spend on maps. Also, it is often difficult for a committee to allocate funds for an item such as a map.

However, for promotion of the Show, for locating of the venue and for organizing the event, maps are vital.

Alan produced the map of the Glen Innes Showground as a promotion for Glen Innes at no charge.

The Primex Casino Location map was produced as Alan found it difficult himself to find the venue when he visited.

The Caboolture High School map also shows the kind of detail that could be of use in organizing a show and allocating spaces to the numerous stall holders at the show.

These maps can be used:

- On the internet to promote the show
- On notice boards at the show or in the office to aid in communication
- As printouts to the numerous people who work at or who visit the show grounds, and
- As a record of the hidden detail in the form of water pipes, electricity lines, power outlets etc, etc.

Contact Mayne Maps and tell Alan about your property and your requirements. He will provide an expected price or a quote and also send you samples of maps similar to your property that he has produced in the past.
