## MAYNE MAPS - REAL ESTATE MAPS

With the advent of the World Wide Web and the internet, the promotion and selling of Real Estate is no longer confined to the Real Estate Agents office.

Maps can be posted on the WWW and viewed all around the world.

Any potential buyer anywhere in the world can view properties in which to invest.

A highly detailed map such as produced by Mayne Maps can display at a glance more information than could ever be described or even viewed by a brief site inspection.

**“A PICTURE TELLS A THOUSAND WORDS”** has never been more true than with these maps of properties for sale.

This map cost the owner less than \$1500 and will probably pay for itself many times over in both the return for the seller in the price he receives for the property and the time it takes to sell the property.

An added bonus of full colour, high detailed maps such as these is that the new owner is in a better position to manage and run the property using these maps.

Maps can also be used with mapping software on the computer and also on the face of a GPS screen.

Contact Mayne Maps and tell Alan about your property and your requirements. He will provide an expected price or a quote and also send you samples of maps similar to your property that he has produced in the past.
